About me

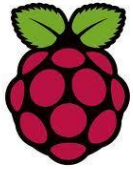

- My name is Akkie(AKKI--).
- Sorry, I can't speak English...
But! I can write little English ! (🙌 ூ 🙌)

Powered by

- excite translate

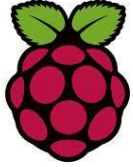

The screenshot displays the 'excite 翻訳' (excite translate) website. At the top, there is a navigation bar with language selection options: 英語 (English), 中国語 (Chinese), 韓国語 (Korean), フランス語 (French), ドイツ語 (German), イタリア語 (Italian), スペイン語 (Spanish), ポルトガル語 (Portuguese), and ロシア語 (Russian). Below this, there are links for 'テキスト翻訳' (Text Translation), 'みんなで翻訳' (Translate with everyone), 'ウェブページ翻訳' (Web page translation), and 'あなたのホームページを英語に' (Translate your homepage to English). A promotional banner for 'PR 比べてくださいこの金利！上限金利年率9.8%。東京スター銀行。' (Compare this interest rate! Maximum interest rate 9.8% per year. Tokyo Star Bank.) is visible. The main interface features two text boxes: '原文' (Original text) on the left and '訳文' (Translated text) on the right. The original text is '簡単に作れる' (It can be made easily) and the translated text is 'It can make easily.'. A '翻訳' (Translate) button is positioned between the boxes, along with a '再翻訳' (Retranslate) checkbox and a 'クリア' (Clear) button. Below the original text box, there is a warning icon and a message: 'どうしてもうまく訳せないときは...? プロの翻訳家に依頼する(500円~)' (If you can't translate it well...? Hire a professional translator (500 yen~)). At the bottom of the interface, there are buttons for '対訳表示' (Show side-by-side), '翻訳を保存' (Save translation), and '再翻訳' (Retranslate). A search bar at the bottom contains the text '辞書検索 英和 It can make easily. 検索' (Dictionary search English and Japanese It can make easily. Search).

Today's my RPi

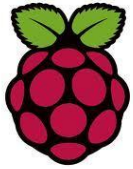

- (I have 5 RPi.)
- Hand made case by Balsa. It can make easily.
 - NO REPLACEBLE! ;-)

Running on RPi

- OS is Raspbian
- Web eject system.
- FavEject.

FavEject

FavEject

- ... the tray of a CD-ROM drive will open.

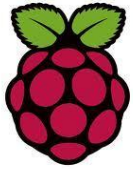

FavEject

- That's All.
- (👉 ◡̈) 👉 ウイーン

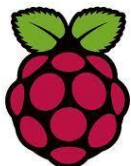

Air conditioner remote controller

Remote controller...

- Push power button by tray of CD-ROM drive.
- Modify the remote controller because a tray makes a button easy to push.

Remote controller...

- Control via Web.
- Web design optimized for the phone.
- Get temperature (Now using USB dongle. But I think that I will use the thermo sensor...!)

エアコンのリモコン

室温

● 27.00 °C
