The RS logo consists of the letters 'R' and 'S' in a bold, red, sans-serif font, enclosed within a red square border.

About me

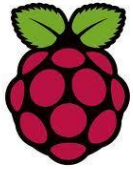

- My name is Akkie(AKKI--).
- Sorry, I can't speak English...
But! I can write little English ! (🙌 ூ 🙌)

Powered by

- excite translate

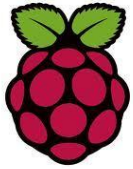

The screenshot displays the 'excite 翻訳' (excite translate) website. At the top, there is a navigation menu with language options: 英語 (English), 中国語 (Chinese), 韓国語 (Korean), フランス語 (French), ドイツ語 (German), イタリア語 (Italian), スペイン語 (Spanish), ポルトガル語 (Portuguese), and ロシア語 (Russian). Below the menu, there are links for 'テキスト翻訳' (Text Translation), 'みんなで翻訳' (Translate with everyone), 'ウェブページ翻訳' (Web page translation), and 'あなたのホームページを英語に' (Translate your homepage to English). A promotional banner for 'PR 比べてくださいこの金利！上限金利年率9.8%。東京スター銀行。' is visible. The main interface features a text input area on the left with the Japanese text '簡単に作れる' and a language dropdown set to '日' (Japanese). A '翻訳' (Translate) button is in the center, with a '再翻訳' (Retranslate) checkbox below it. On the right, the output area shows the English translation 'It can make easily.' with a language dropdown set to '英' (English). Below the output area, there are buttons for '対訳表示' (Show side-by-side), '翻訳を保存' (Save translation), and '再翻訳' (Retranslate). At the bottom, there is a search bar with '辞書検索' (Dictionary search), a language dropdown set to '英和' (English-Japanese), the text 'It can make easily.', and a '検索' (Search) button. A 'ブログに投稿' (Post to blog) button is also present in the top right corner.

Today's my RPi

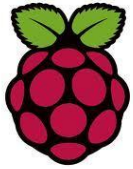

- (I have 5 RPis.)
- Hand made case by Balsa. It can make easily.
 - NO REPLACEBLE! ;-)

Running on RPi

- OS is Raspbian
- Web eject system.
- FavEject.

FavEject

- If I have a favorite given by Twitter,

FavEject

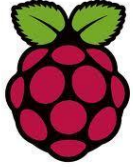

- ... the tray of a CD-ROM drive will open.

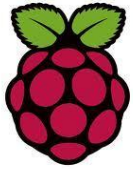

FavEject

- That's All.
- (👉 ◡̈) 👉 ウイーン

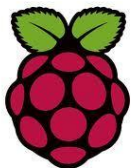

Air conditioner remote controller

Remote controller...

- Push power button by tray of CD-ROM drive.
- Modify the remote controller because a tray makes a button easy to push.

Remote controller...

- Control via Web.
- Web design optimized for the phone.
- Get temperature (Now using USB dongle. But I think that I will use the thermo sensor...!)

エアコンのリモコン
